WWW Bold Profile

WWW linkedin.com/in/trilochana-chary-7b73b

Senior Software and Data Engineer with 10+ years of experience in enterprise application development, backend engineering, cloud-native technologies, and distributed systems. Experienced in ETL pipelines ,Java, Spring Boot, REST APIs, microservices, SQL, Docker, Kubernetes, and DevOps practices. Strong background in application modernization, deployment automation, troubleshooting, and production support. Skilled in designing scalable technology solutions, applying software design patterns, and collaborating with cross-functional teams to deliver reliable enterprise applications.

Skills

Big Data Frameworks: Hadoop, Apache Spark, Hive, Kafka

Cloud Platforms/Tools : AWS, Microsoft Azure DataBricks , ADF, ADO, Airflow , MQ solace ,Kafka ,Trino

ETL & Data Warehousing: ETL Development, Data Pipelines, Data Integration,

Programming Languages: Python, Shell Scripting, Node.js, Scala, Java

- **DevOps Tools**: Docker, Kubernetes, Jenkins, Ansible
- **Web Technologies**: Django, Angular, React, RESTful APIs, GraphQL

Databases: SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Redis)

Data Visualization: Superset , Power BI

Blockchain Expertise: Hyperledger, Ethereum, NFT , Solidity

Work History

2023-05 - Current

Lead Data Engineer

Standard Chartered Global Business Services, Bengaluru, India

- Designed and maintained end-to-end ETL pipelines, ensuring data accuracy and reliability.
- Migrated legacy systems to modern big data technologies, improving scalability and reducing downtime.
- Implemented data processing workflows using Hadoop and Spark for real-time analytics.
- Develop and maintain backend services and REST APIs using Java, Spring Boot, and microservices architectural principles.
- Support application deployment, configuration management, troubleshooting, and operational stability across distributed environments.
- Collaborate with application, infrastructure, DevOps, and business teams to coordinate development, testing, release, and production support activities.
- Work with SQL and relational database concepts to support data access, application integration, and backend processing.
- Use containerization and DevOps practices to improve deployment consistency and application lifecycle management.
- Investigate application logs and technical issues to identify root causes and support incident resolution.
- Evaluate automation opportunities to streamline development, deployment, and operational processes.

2021-09 - 2023-01

Full Stack Web Developer

IDS Soft , Hyderabad

- Used Javascript, SQL and HTML to develop app-solutions.
- Increased website performance by optimizing front-end and back-end code for faster loading times.
- Applied responsive design principles to ensure consistent display and functionality across a wide range of devices, including mobile phones, tablets, and desktop computers.
- Created easy-to-use APIs for third-party integrations, enhancing the functionality of existing applications without compromising on performance or security.
- Developed the **Bharat Blockchain Network**, utilizing Hyperledger Bevel for a university blockchain consortium.
- Designed and launched an NFT marketplace with royalty features based on the ERC721 token standard.
- Streamlined team operations and communications, ensuring project deliverables met deadlines.
- Conducted in-depth research and implemented innovative blockchain solutions tailored to client needs.

2020-10 - 2021-09

Senior Software Engineer

Somish, Remote

- Enhanced software functionality by identifying and resolving complex technical issues.

- Delivered exceptional client support by promptly addressing concerns and implementing requested changes or enhancements to software solutions.
- Developed scalable applications using agile methodologies for timely project delivery.
- Delivered a blockchain-based invoice refactoring platform leveraging Hyperledger Fabric.
- Designed and developed enterprise applications using Django, PostgreSQL, and multi-user workflows.
- Streamlined transaction and approval processes with custom-built workflows for internal stakeholders..

2017-10 - 2018-05

Senior Software Engineer

Snapperfuturetech, Hyderabad, India

- Enhanced software functionality by identifying and resolving complex technical issues.
- Mentored junior developers, fostering professional growth and enhancing team productivity.
- Developed scalable applications using agile methodologies for timely project delivery.
- Managed multiple projects simultaneously while maintaining strict deadlines and high-quality standards.

2011-02 - 2015-12

Software Engineer

TCS Siruseri, Chennai, India

- Developed scalable and maintainable code, ensuring long-term stability of the software.
- Integrated new technologies into existing systems, increasing capabilities and improving overall performance.
- Developed reusable components that significantly reduced development effort on multiple projects.
- Implemented effective debugging strategies, resulting in fewer software defects and increased reliability.
- Developed and tested software components in alignment with client specifications.
- Prepared technical design documents, test plans, and system test scenarios.
- Conducted comprehensive system testing to ensure high-quality deliverables.

Education

2006-05 - 2010-06

B.Tech: Electronics & Instrumentation Engineering

Kakatiya Institute of Technology & Science - Warangal

2016-04 - 2016-08

Certification in Big Data Analytics

International School of Engineering (INSOFE) - Hyderabad

5 months

Certificationsaffiliations

- Member, Linux Foundation
- Member, Hyperledger Foundation
